EVENT
ANNOUNCEMENT

SPE Chicago Virtual Lunch & Learn Event May 18th, 2022

Event: Laser Texturing Process for Molders and their many Benefits

Event Topic: Chemical etching is the traditional means to texture a die for injection molding. This lunch & learn will show how laser etching can produce patterns once made through chemical etching.

INSPIRING PLASTICS PROFESSIONALS
CHICAGO SECTION 

Presenter: Jon Carlson - Sales & Marketing
Manager, Wisconsin Engraving
May 18th, 12:00 PM Chicago Time

Chemical etching is the traditional means to texture a die for injection molding. This Lunch & Learn will show how laser etching can produce patterns once made through chemical etching and develop complicated geometric patterns that were once impossible with conventional methods.

Many industries such as automotive, aerospace, medical, consumer goods and packaging are leading the charge with complex finishes and geometrics for their applications. Laser etching is a new and exciting technology with endless opportunities. Please join us to learn more about this technology and how it could benefit your latest project.
